LOWES MOUNT DOG POOP FACTORY!

How many dogs are there going to be at the Lowes Mount POOP factory? Has Council asked for or been given maximum and minimum numbers?

Good question.

Do you think Council should ask this question?

The poop is going to be picked up every day. How can you make this statement and include this in a Development Application and how can it be considered seriously? I'd like to see the owner picking up the poop from twenty dogs daily, especially after they've been fed can dog food!

Dogs being kept in a shed. Now I'm sure that's natural and I'm sure they wont make any noise.

No need for a GEOTECH!

Every other application for anything in Oberon Council's domain needs every possible application, even studies regarding Koalas!

It's O.K it's a Council Employee's property.

Has any investigation has been done by Council's Approving Officer regarding the operations of existing Dog Kennels?

Are the statements included in the lodged Development Application true and have they been compared with enquiries to other Dog Kennels?

Or are the statements just what Employee's of Council have been told to put in?

Lowes Mount Road is already a Tourist Drive generating loads of Tourist Traffic. It's shown on the bill board outside Council. How safe will access to the Dog Kennels be! Council has just spent a substantial amount on safety sign all the way up to Lowes Mount Kennels. Maybe there should be some investigation into Safe Access at this location ?

Diamond Vale Road is a Pubic Road. It's not an extension to Council Employee's property. Has the Public been advised and asked for comment? Have State Forests been advised and asked for comment?

No need for any serious questions, It's alright the owner is a Council Employee!

Hello ICAC. Where are you now?

Is anyone going to monitor the operations of this business?

Do you have any concerns that this may affect or compromise your current lifestyle? If you do then you should ring Oberon Council, on 63298100 before Friday 30th March 2012.
