7. QUESTIONS FROM THE PUBLIC

Donna Russo from Gingkin stated her opposition to fluoride being added to the Oberon water supply. She has studied health for 30 years and restored her daughters health after she suffered from eczema. Donna advised she had voted for the Councillors to represent the community and wants assurance that Councillors have done their due diligence in this matter.

Robin Wiseman spoke about fluoride and commented that the community have said emphatically no. Robin outlined her previous health issue having aluminium behind her eye and her daughters medical background. Due to this Robin has researched Alzheimer's and other medical conditions and advises "if in doubt don't do it". Robin is aware the Government has an agenda but it shouldn't be forced upon us as a community. She also requested Councillors do their own research prior to making any decisions.

Chris Freeman addressed Council and offered an apology for confusion. Chris asked Council to confirm if the fluoride that's proposed to be added to the water supply is calcium fluoride or sodium fluoride. He asked Council to confirm that sodium fluoride is free of all other industrial contaminates. Can Council confirm it doesn't contain any lead, arsenic or aluminium.

The Mayor replied, Council has not decided to add fluoride to the water or sourced the product as yet. The question was taken on notice and advice will be provided to Chris when it is available.

Phillip Haynes addressed Council in relation to the effect of fluoride on animals. He read a passage in relation to the effect on guinea pigs which stated the animals should be given water from pure sources such as rain water. Reticulated water containing fluoride and chlorine should be avoided. Magnesium is something that is needed in the body and sodium fluoride in water inhibits the uptake of magnesium and calcium. Pets should not be fed anything but rain water. Another side effect is it inhibits absorption of Vitamin A & E.

Veronika Cvitanovic advised that she along with some friends is providing information on fluoride to the community. She has received 300 signatures on a petition to date and 21 shops have agreed to put signs in their windows. She has also collected 41 letters from individuals and notes the correspondence already supplied to Council. Veronika commented that a lot of people are incredibly angry that after four years this policy is being reviewed and hopes Council enjoys the public feedback, there is no support for this policy at all.
