6. PRESENTATIONS

The Audited Financial Statements for 2017/18 were presented to Council by John Thompson, Crowe Horwath.

Apologies were received from Diminika Ryan, Audit Office who was unable to attend.

Clr McKibbin asked is the presentation available to ratepayers not present? John Thompson responded, yes it is available to ratepayers generally, but is not for any other purpose.

Clr McKibbin asked a question about revaluations which was taken on notice.

Debt Service Ratio – Page 118 12.48 - 2018, 12.11 – 2017, 12.48 - 2016 this figure needs to be corrected.

Debt Recovery – trending in negative position. Lynette will be bringing a report to council in relation to this. John Thompson commented this is under the benchmark, marginal increase.

Clr McKibbin asked if we proceed to a fluoride plant and the capital is provided by NSW Health does that have to come into our accounts. This question has been raised directly with Councillors by a number of ratepayers directly. The question was taken on notice by John Thompson. Lynette will provide additional information to John to assist with the enquiry.

Clr Doney asked can you suggest some of the lead quantitative indicators you spoke about. Would they be based on economic forecasts and population trends by and large. John Thompson responded lead financial ones would be more about forecasts, which is what Oberon includes in its QBR Statements. Other things include expectations, surveys. John will provide a more comprehensive list.

Clr Doney asked in our comparison with other Group 10 councils should we be sourcing benchmarking through the Office of Local Government or is it something Crowe Horwath does? John Thompson responded that is something that the Audit Office is looking at, the question was taken on notice.

Page 5 of the Minutes of the Ordinary Meeting of Oberon Council held on Tuesday 20 November 2018.

Clr Doney asked could you please give us a reason why valuing roads, footpaths, bridges at \$177M and sewerage system at \$9M what value is that to us as councils and the community to have numbers on those type of things. John Thompson responded if it is producing a benefit it needs to have a value on the books. We look at the valuers reports and test the rationale behind it and challenge how they came up with their valuations at a high level. The practice of valuations is consistent across all councils. A lot of Council's underground infrastructure is ageing and it is hard to establish the value, but if its working there is a value to it.

Clr Doney commented valuation assumptions are by and large historical cost convention as modified. So are our road valuations based on the constructions costs? John Thompson responded that's the start, but they then look at replacement cost, condition assessment, unit costs. The valuations are quite complex which is why this is an area of focus for the Audit Office.

Clr Doney asked about the capitalised employee costs which is the provision for long service and other leave types, I believe the reserve was at \$1m last year, in your professional opinion is that adequate and should that be increasing? John Thompson responded the question last year was around the adequacy of the restricted assets. I believe is significantly covered. We know in reality that not everyone is going to draw on this in one go, the reserve is adequate for the history of claims and payouts. \$1.5M – restricted assets \$1m. This is considered reasonable and adequate for the liability. Employees are adequately covered.

7. QUESTIONS FROM THE PUBLIC

Chris Freeman asked the following questions:

1. Firstly, the suppression and censorship of fluoride information in town – specifically what has occurred at the local post office over the last week. The posters that were displayed at the time of the takedown request were geared to be informative, not political. This higher level of suppression and intimidation of our Post Office staff should serve as a warning to us all about the danger of standing against the controversial policies of the orthodoxy. I would hope that as other posters go up around the town that shopkeepers opposed to fluoridation do not come under a similar level of intimidation.
2. The ongoing issue of freedom of choice. NSW Health have recently granted Oberon Council permission for Sodium Fluoride or Sodium Fluorosilicate, both of which are confirmed S6 poisons, and as we all well know, contaminated with trace amounts of heavy metals and other toxins. Neither of these are natural calcium fluoride, and to perpetuate the myth that one is the other is to surrender to a marketing campaign to sell a waste product, not to serve the truth. The people have a right to choose. Fluoridation of the water supply takes away that choice.
3. The upcoming JOC Meeting in Oberon and the question of public access. A recent conversation I've had with one of the councillors brought up that how one views this new super-council is a matter of perspective. In light of that, and in the spirit of open and informed understanding I would like to ask the following:

Are the meetings being held in Oberon open to the public as both state and local governments are? If so, where and when would we be able to attend?

The Mayor responded the question will be taken on notice.

Robin Ashton made the following statement.

I would like to see greater adherence to the principles of good leadership and democracy as Council persists in a course of action that it deems beneficial, despite evidence that the community is still divided on the issue. True leaders don't dismiss opponents but attract followers to their cause.

As conflicting numbers were circulating on the fluoride matter, I volunteered to knock on doors in an attempt to find out true indications of those in favour of adding fluoride and those who oppose the move. Even if the survey did not measure up to some peoples perception of best practice, the overall message was quite clear. Of those who answered my knock on their door, 77% were opposed and many were quite angry as they felt that Council was not listening to them. On a personal level, I found the insinuations of intimidation and falsifying findings hurtful and unnecessary. Denigrating opponents isn't showing good leadership but rather the low behaviour we see in Federal politics... not what we want here in Oberon. Throughout history there have been groups and individuals who continued to fight against those in power over issues they thought warranted the struggle. This is not a case of 'dummy-spitting' as has been suggested. It is a case of people who are committed to a cause continuing the battle because they believe the issue is worth their time and energy.

Being elected to the Oberon Council does not make you more knowledgeable or your sources of information more valid. True leaders take the time to really listen to other viewpoints and to try to convince others to follow, rather than just forging ahead with the unspoken message of 'we know better than you'.

Your job now is to take steps to mend the division within the community. It is disappointing that no such moves have been visible as yet but it's not too late. Put in place measures to gain a true and accurate picture of the people's will. Take action to convince the people that you are listening to them. While there will always be those on both sides of any debate who will cling to a belief regardless of information it behoves Council to make the effort to heal the wounds. There is still time. Such moves would reaffirm the people's faith that democratic process is still followed here.

Racheal Maher addressed Council and commented although I appreciate Kathy taking the time to respond, I am disappointed by the response to previous questions. I would like to make it clear I stand here greatly supported, I am not categorically anti-fluoride, I am for freedom of choice. I know that this is precisely what the underlying issue of adding fluoride to Oberon water boils down to. Whatever situation you are in it takes extreme conscious effort to distance oneself from bureaucracy. I will continue to be the voice for this town and not have that taken away by those that think their voice is sweeter. When we ignore the truth that is what we become. I have like many of you friends that have had cancer. Two friends chose different paths. 1 chemo, one natural therapies and diet, both made a full recovery, both were able to choose what was right for them. If you were in this situation what treatment would you choose? There is no difference in adding an S6 poison for a whole town because someone thinks they know a better treatment than the person does themselves. Are you really so naive to believe that teeth are a separate identify to the rest of the body. I don't believe anyone here is that uneducated. You are robbing people of the opportunity to learn. Teach and promote healthy eating, proper dental hygiene and whole body health. As each have you compromised your moral values and are you strong enough to seek that within in you. I ask you to leave legacies.

Melissa Jones addressed Council. I think it's great you are growing a Mo for Movember. It has been proven that fluoride can cause depression. There was an anti-amalgamation and no one wanted it, it was fine for Bernice and Wayne to stick up posters then, but it's wrong that they are

Page 7 of the Minutes of the Ordinary Meeting of Oberon Council held on Tuesday 20 November 2018.

getting targeted. Where does the buck stop here with council on that situation? NSW Health can say what should be put up and what shouldn't. I don't think the posters should come down. When it suited council they also put them up in Australia Post's window. We are amalgamating as we have joined a JO now. Ian made a comment weeks and weeks ago as you discussed with Centroc. We are amalgamated by stealth. If you wanted to fight that you would be saying to Wayne and Bernice and I think its bullying.

The Mayor responded that we don't know where that's coming from. Why is it coming to Council? What is the complaint?

Melissa responded you have backed NSW Health to put fluoride into our water supply.

Keith Sullivan commented it seems to be wishful thinking that one day we will re-establish due process and community harmony. I compliment the people who have spoken tonight. Throughout this whole process this group have carried out their side of the debate without making it personal and presenting their facts as clearly as they can. I am concerned about what the council has allowed to happen to the Post Office. My response was that it wouldn't be the councillors and I would like to think no councillor or staff member would conduct themselves this way. We argue amongst ourselves, we object to the fact that outside influences have come into town to join the debate. They spread rumours. The NSW Health Department say that fluoride is a natural substance and it is, but that's not what's going into our water. It's a chemical by-product of an industrial process. The way our Post Master and Mistress have been treated, I want to say that council should go about getting it fixed. The process is simple, council should write to our federal member asking them why are they getting involved in what is a domestic issue in this community. The feeling in town is the tar is boiling. This person is not acting in accordance with what is right. One thing we should have in common is we are here for one another. I will pass my suggestions onto Gary. There are things the Council can do that will show the Councillors doesn't condone this action. Ask them to communicate with the Council not direct with the community.

Hardy Draheim spoke in support of what Keith Sullivan is saying, there is a legal campaign going on against our post master which seems to stem from the same cause. I think this is not right.
