

## **LEVEL 2 WATER RESTRICTIONS NOW APPLY IN OBERON**

As the level of the Oberon Dam has now fallen to below 40% capacity, Level 2 Water Restrictions have been introduced effective from Thursday 13 June 2019. Level 2 restrictions are designed to reduce non-essential use of water and reduce the impacts on the Oberon Dam during dry periods.

Details of Level 2 Water Restrictions are as follows:

- Residential Gardens – Fixed hoses and sprinklers connected to the Oberon reticulated water system are banned.
- Micro-sprays can be used for 15 minutes and hand held hoses for 2 hours every second day, outside the hours of 8am to 4pm, on odd or even days matching house numbering system.

More stringent restrictions will be introduced if the Oberon Dam falls to a level below 25% capacity – Level 3 Water Restrictions will be applied and details will be widely advertised.

The community's awareness and contribution to water efficiency is acknowledged and consumers are reminded that during dry periods additional reduction in consumption is required to sustain our water supply.

These restrictions will continue until further advised.

Further information about saving water at home, in the garden and in your business can be found on Council's website at <https://www.oberon.nsw.gov.au/technical-services/water-supply/smart-approved-watermark>
